Division of Vocational Schools

A LIST OF HELPFUL PUBLICATIONS CONCERN- ING VOCATIONAL INSTRUCTION

INTRODUCTORY NOTE

This bibliography has been issued at the request of a number of teachers for a list of text and reference books which would be helpful in their classroom work as well as an aid in a wise selection of general literature on vocational instruction for their own self-improvement.

No attempt has been made to list all the books dealing with vocational instruction. The titles presented were selected after a careful examination of a large number of books and while every care has been taken to obtain complete lists and to select intelligently from an extended field, it is possible and even likely that some most excellent books have been overlooked. This division will welcome the title of any book which, in the opinion of the reader, should be added to this list. Very likely supplementary lists will be issued from time to time.

It is not possible for a teacher to present the subject matter effectively unless he knows the educational and industrial aims of vocational instruction. There is hardly a public library in the State that would refuse to place on its shelves all or nearly all the books mentioned as suitable for general reading purposes.

Undoubtedly every teacher can obtain at a comparatively slight expense copies of the reports and bulletins listed. Many of them are free and all of them are of inestimable value. They contain courses of study, illustrations, outlines, valuable statistical material and definite data obtained from extensive investigations. In fact, it is almost possible to build up a working library out of national, state and city publications. There has never been a time when so much valuable material on vocational education was available by the exercise of a little initiative on the part of a teacher. The United States Bureau of Education has published at frequent intervals most

10 D 14 24.11.14
St. J. H. Y. Ex.

helpful material. The National Society for the Promotion of Industrial Education distributes to its members bulletins and reports which record the advance of vocational education, and a complete set of its reports practically constitutes an up-to-date survey of this new movement. For the mere asking the United States Departments of Labor and Agriculture stand ready to distribute documents which may promote professional growth and give valuable aid to classroom instruction.

It is difficult to see how a teacher can do effective work without reference books dealing with the subject matter which he teaches. The technic of the vocation is constantly changing and every teacher should be up to date. Teachers of shop and laboratory work should not rely upon past knowledge and teaching experience which is expected to fit pupils to meet the demands of the vocational life which has changed from the day when the teachers learned their trades. The teachers of mathematics and science should not expect to find all their teaching material in one book. There are many books and practical, technical guides with which the teacher should be familiar. Every vocational school or department should have its library of helpful reference material. Vocational instruction requires these reference books in the same way and to the same extent as any other school work.

It is hardly possible for the pupil to receive efficient instruction unless he has access to helpful books. For example, how can a boy attend a printing school and learn to exercise the habit of self-improvement after he leaves school unless he is taught how to use technical magazines, to seek information in the technical aspects of his chosen craft while in school? And again, how can a girl learn effective millinery designs and gain the habit of seeking for the latest and best in styles unless when receiving instruction she has access to a good millinery publication?

Vocational instruction has or should have more to it than mere technic or handwork. It is not sufficient for a boy to be taught to bend hot iron or to make a weld; he should be taught the theory underlying the practice. No one desires merely a mechanical-minded trade worker. In this industrial age, the craft or vocation will never produce a thinking worker unless its youth has instilled in it before it leaves school, the desire to know the why as well as the how of the trade. The automatic teacher is as deadening as the automatic machine. Whatever spirit the teacher expresses in his teaching is likely to be imitated by the pupil after he leaves school. The girl who is told to "do this" and then to "do that" in a cooking

A 371.42
N 48c

class without reference to the thought side of the work is likely to follow blindly all the days of her life the habit of thoughtlessness originally imparted by her teacher. The vocational school should create the student habit.

Slides, photographs and exhibits of materials should form a part of the instruction. The Division of Visual Instruction has most helpful material in the shape of slides and photographs. Many industrial concerns will loan or donate materials for exhibition purposes. When one starts out to collect for illustrative purposes, he is astonished by the amount of excellent material which is his for the asking.

A space has been left at the end of each section for the teacher to write in the names of additional books, reference material or aids in teaching which may have come to his attention, or new material which will be issued after he has received this bulletin.

If the individual teacher will exercise some initiative on his own part in procuring for his own use some of the material furnished in these lists, if he will take steps to have some material furnished by the local authorities to the school library, if he will advise that the local library furnish a few books on vocational instruction for the adult reading public and the pupils in the vocational schools, if he will avail himself of the services of the Division of Visual Instruction, the New York State Library, the other state and national departments, I am sure that vocational instruction within the State will reach a higher plane of efficiency.

ARTHUR D. DEAN

The following material is invaluable in teaching industrial history and geography:

Industrial arts. The growth of industrial arts; compiled under supervision of commissioner of patents for World's Industrial and Cotton Centennial, 1885. Reprinted 1892. This publication consists of 200 large lithographic plates (16 by 20 inches) bound together in book form. The plates illustrate the growth of industrial art by showing the most familiar tools, implements, and machines in the form in which they were known to earlier generations and also in the improved forms to which modern invention has brought them. Government Printing Office, Washington, D. C. \$2.

United States Department of Agriculture, Washington, D. C.

Forest Service Bul. 10. Timber

Forest Service Bul. 36. The Woodsman's Handbook

Farmers Bul. 173. A Primer of Forestry. Pt 1 The Forest

Farmers Bul. 358. A Primer of Forestry. Pt 2 Praetical Forestry

Maps (free):

Natural Forest Regions of North Ameriea (paper, 16" x 20")

National Forests of the United States (paper, 21" x 33" or 5' x 7')

Material which may be had temporarily as loans:

Photograph exhibit. A set of forty-four large, mounted photographs, arranged in eleven series, four in each series, illustrating some special feature of forest work or forest conditions in the United States. Eaeh series of four photographs is mounted on a strip of green denim eloth, with eyelets at the upper end for hanging on the

wall. The entire exhibit may be engaged for a short loan by any school willing to pay transportation charges.

Lantern slides. The Forest Service has an extensive collection of lantern slides illustrating forestry and related subjects, from which sets may be loaned for short periods of time, on condition that the borrower pay transportation charges and assume the responsibility for loss or breakage. An outline of subjects of these slides will be sent on request.

New York State Conservation Commission, Albany, N. Y.

Bulletin 1. Forestry and Forest Resources in New York. 1912

University of the State of New York, Division of Visual Instruction,
Albany, N. Y.

The Division of Visual Instruction has a complete and extensive collection of slides which may be loaned for short periods by the schools in the State. Complete lists will be sent upon application to this Division. The following list of sets of slides is of particular interest to teachers of vocational subjects:

List 3: Iron and Steel. Eighty-four titles on mines and ores, general aspects of the industry, coke as fuel, pig iron, wrought iron, Bessemer process, open-hearth process, rolling mills, construction steel, foundry practice, physics and chemistry of the industry, ingots and their defects, sociology.

List 21: Coal Mining. Forty-two titles on the Carboniferous age, coal veins, the mine, surface structures and operations, the breaker, homes of workmen, storage, transportation and map.

List 22: Clay and Clay Products. Fifty-four titles on common brick, other practical clay products, china clay, processes of pottery making, aspects of pottery making in other lands, ancient pottery, some artistic articles of pottery, enamel ware.

List 20: Salt. Eighteen titles on the solar process, general views of salt works, the grainer process, the vacuum pan process, putting up fine salt for market, rock salt, alkali products.

List 9: Natural and Artificial Ice. Nineteen titles on harvesting natural ice, a simple refrigerator, artificial ice (a) the ammonia cycle, (b) the water system, storage and map.

List 23: Forestry and Lumbering. [In press]. About 70 titles on the forest, the lumber camp, felling, sawing and skidding, winter hauling, log driving, wood lots, lumber, other forest products, the tree nursery, tree planting, outside of New York State.

List 5: Naval Stores. Fourteen titles on yellow pine forests, process of manufacture, sources and distribution of naval stores.

List 4: Maple Sugar. Seven titles on gathering sap and converting it into sugar and syrup.

List 19: Panama Canal Zone and vicinity. Eighty titles on maps, Old Panama, Porto Bello, the French in Panama, sea-level approaches to the locks, excavations, slides, Chagres river, locks, Gatun lake and dam, other canals, sanitation of Canal Zone, life in the Canal Zone, laborers, local transportation facilities, Taboga island, the city of Panama, an American enterprise.

There will be announced from time to time lists on other industries including cotton, sugar, wheat, slaughtering and meat packing, stone products, fisheries, fruit raising, transportation, etc.
